

# STORE LOCATOR

1

**Header:** The main area for branding. It often will include the logo, any hero image, and the navigation, or back button. Larger headers push the map down.

2

**Map:** A Google map. It occupies as much vertical space that is not used by the header and footer (170px at smallest). When the unit appears, the user must choose either "Current Location," and allow their location to be shared, or "Custom Location," and type in their address, or zip. From there, locations populate on the map. Client can provide either a Google Map Search Term, or a CSV file of locations.

3

**Location Details:** Area appears after a user has tapped on a specific location. It can feature: location name, address, distance from user, call button, get directions button.

4

**Footer (optional):** Additional area for branding, legal, social media links, etc.

## DELIVERABLES

**Header:** One static graphic (jpg, png, gif) including all relevant URLs with details of clickable areas.

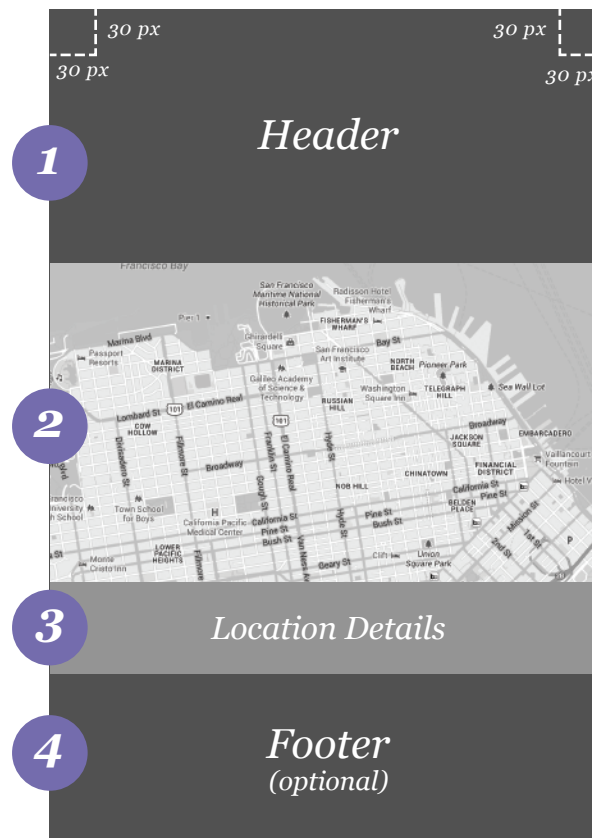

**Footer:** One static graphic (jpg, png, gif) including all relevant URLs with details of clickable areas.

**Location Details:** List of requested features: location name, address, distance from user, call button, get directions button.

**Map:** Google search term, or CSV file of locations.

**Map Pin:** 50 x 50px location marker pin.
